The TAC NETWORK 8000 MICROZONE II (MZII) is a fully programmable controller that enhances the TAC NETWORK 8000 Facility Management System family offering. The MZII has the ability to employ custom block programs and run them in a stand-alone mode. The MZII block programming language provides the system operator with 100% flexibility for creation of new and unique control strategies.

TAC MICROZONE II is easily applied to a wide variety of mechanical equipment including those that are application specific. Through the Personal System Interface (PSI™) and Xtended Personal System Interface (XPSI™), control programs can be downloaded to all devices requiring the sequence of operation. With the MZII, the TAC NETWORK 8000 provides the best of both worlds; full programmability for easy creation and modification of custom control strategies, and easy duplication of controller databases for mechanical equipment containing similar or identical control strategies.

The MZII utilizes state-of-the-art, surface mount technology which helps reduce the size and cost of the product while providing powerful product features. Modularity of hardware along with the networking capabilities allow easy expandability as the needs of the facility change in the future. As with all other programmable TAC NETWORK 8000 controllers, the MZII utilizes non-volatile EEPROM memory to store application control programs. EEPROM memory allows an owner to modify existing control sequences or create new ones through the Personal System Interface (PSI).

**Communications**

**Ports**
- RS-485 asynchronous at 19,200 baud (adjustable) to global controller. Modular jack provided for local connection of the Personal System Interface.

**Local Terminal (PSI)**
- PSI can monitor all device parameters and has access to all program blocks and attributes for complete program editing and creation. Provides up/download capability for system maintenance.

**Network Device Access**
- PSI connected at one device has access to all network-wide devices on an ASD communication bus. Connection of PSI will not disrupt the network communications between the MZII controller and other devices on the bus.

**TAC NETWORK 8000**
- Up to 128 MZIIs per Global Control Module. Shared network data includes all physical input/output points plus capability of WINDO and EMS blocks which are program definable.
SOFTWARE SPECIFICATIONS

Control Functions
Refer to Table-2.

Accessories
AD-8969-101 10 k ohm shunt resistor kit for high speed count input
AD-8969-202 250 ohm shunt resistor kit for 4 to 20 mA analog input
AD-8969-206 11 k ohm shunt resistor kit for 10 k thermistor sensor (non-850 series)
AD-8961-220 Voltage divider (converts 1 to 11 Vdc signal to 0.5 to 5 Vdc signal)
AE-690 Accessory outboard gear panel
ENCL-MZ800-PAN Enclosure, panel mount
ENCL-MZ800-WAL Enclosure, wall mount
LAPT-80800-PSI TAC Personal System Interface software (see F-24317)
LAPT-80800-EPS-I Xtended TAC Personal System Interface software (see F-24317)

Note: All field wiring shall be twisted, shielded pairs.
**SPECIFICATIONS**

**MF2 SERIES**

**HARDWARE SPECIFICATIONS**

**Enclosure**
Conforms to NEMA-1. UL-916 rated.

**Power Supply Input**
20.4 to 30.0 Vac, 50/60 Hz.

**Maximum Power Consumption**
20 VA at 50/60 Hz.

**Transient Compliance Tests**
ANSI C62.41 (IEEE 587), Categories A and B.

**Electrostatic Discharge Test**
±15 kV to case, ±5 kV to field wiring terminals.

**AMBIENT LIMITS**

**Operating Temperature**
UUKL Smoke Control
77 °F (25 °C) nominal.

**PAXZ Energy Management**
-40 to 140 °F (-40 to 60 °C).

**Shipping and Storage Temperature**
-40 to 140 °F (-40 to 60 °C).

**Humidity**
5 to 95% RH, non-condensing.

**Microprocessor**
80C198, 7 MHz clock speed, 16-bit word size.

**Memory**
64 KB of EPROM, 2 KB of EEPROM, 8 KB of RAM.

**Wiring Terminals**
See Figure-1.

**Battery Backup - Clock and RAM**
30 days (replaceable lithium battery).

**Battery Backed-up Time Clock**
Accuracy ±150 sec./mo at 77 °F (25 °C).

**Analog To Digital Conversion Resolution**
10 bit.

**Digital To Analog Conversion Resolution**
10 bit.

**Input to Output Response Time**
0.5 seconds maximum.

**UNIVERSAL INPUTS**

**Quantity**
8.

**Thermistor Input**
20 to 140 °F (-6.67 to 60 °C) range.
TAC Barber-Colman TS-5700-850 series or equivalent.

**Balco Input**
-40 to 250 °F (-40 to 121 °C) range.
TAC Barber-Colman TS-8000 series or equivalent.

**Copper Input**
-31 to 240 °F (-35 to 116 °C) range.
TAC Barber-Colman TS-5600 series or equivalent.

**Platinum Input**
-40 to 240 °F (-40 to 116 °C) range.
TAC Barber-Colman TS-5800 series or equivalent.

**Potentiometers**
1000 to 20,000 ohm resistance.

**Voltage**
0 to 5 Vdc.

**Current**
4 to 20 mA with 250 ohm shunt resistor.

**Contact Input**
Dry.

**Maximum Pulse Count Rate**
10 per second (50 msec. minimum On or Off time per pulse) to 1 per 4 minutes (1 input per MZII).
1 per second (0.5 sec. minimum On or Off time per pulse) to 1 per minute (up to 7 inputs per MZII).

**ANALOG OUTPUTS**

**Quantity:**
4.

**Type**
0 to 20 mA range programmable source into 500 ohm maximum load, momentary short circuit protection.

**DIGITAL OUTPUTS**

**Quantity:**
8.

**Contact Ratings**
30 VA at 24 Vac, pilot duty.
120 VA at 120 Vac, pilot duty.

**Contact Type**
Form C (SPDT) isolated.

**Status Indication**
Light emitting diode.

**Voltage Reference**
5.1 Vdc, 20 mA maximum.
